

For our team in Munich, we are currently looking for a

Supply Chain and Operations Manager (m/f/d)

Industry: Medical Devices

Employment: Full-time position

Qualifications: Bachelor's or Master's (or comparable technical degree) in Engineering or related field; >3 years related work experience; excellent verbal and written English and German skills

Your role

As "Supply Chain and Operations Manager", you will be responsible for driving the complete production process including supplier management, manufacturing, and packaging for existing and new products of iThera Medical for diverse clinical and preclinical applications to the next level.

Specifically, this includes:

- Planning and coordination of production and related resources
- Purchasing activities, including qualification of suppliers, solicitation of quotations and purchase orders, tracking of order status and supplier follow-up
- Developing an active process for managing inventory and determining purchasing needs
- Handling of reclamations for damaged or non-delivered components
- Maintaining and improving production and purchasing policies and procedures
- 'ERP Master' responsible for requirements definition and continuous improvements as well as ensuring timely and accurate entries for products, components, purchasing, receiving and manufacturing
- Supporting R&D in prototype setup and design transfer

Your qualifications / profile

The qualified candidate should have a relevant academic or technical degree in the field of mechanical, electrical, or biomedical engineering or related fields and least 3 years of relevant professional experience.

Particularly preferred skills/experience include the following:

- Sound knowledge of mechanical and/or electrical design
- Understanding of ERP systems, previous hands-on is a plus
- Excellent problem-solving and communication skills
- A very good command of English and German (written and spoken)
- A structured and self-motivated way of working
- A "hands-on" and "can-do" attitude

In addition to the skills listed above, we require a passion for exploring new ground, developing a new business and working closely in a multidisciplinary international environment.

We offer

- An exciting and diversified work environment
- Breakthrough technology in the growth market of medical devices
- Substantial individual responsibility and the opportunity to realize own ideas
- A young, dynamic and international team to work with
- Flexible working hours

Do you want to take on responsibility and help us shape a leading-edge technology in a dynamic environment? Then we are looking forward to hearing back from you!

About iThera Medical

iThera Medical offers the next generation in photonic molecular imaging technology. The company was founded in 2010, as a spin-off from the Helmholtz Center Munich. Together, we pursue the further development of proprietary optoacoustic imaging technology for use in preclinical and clinical applications. Our international customers include the most prestigious research centers, academic hospitals and pharmaceutical companies. Please visit our website for more information (www.ithera-medical.com).

Currently we are a team of 20 nationalities, we value and respect diversity, unique styles, experiences, identities, abilities, ideas and opinions.
